

**FOIA request****David Gossman** to: Group R5Foia

05/04/2015 11:45 AM

From: David Gossman <dgossman@gcisolutions.com>
To: Group R5Foia/R5/USEPA/US@EPA,
Please respond to dgossman @gcisolutions .com

The online form for making a request did not seem to be operational so I am making the request via this email.

Under FOIA I am requesting any information that the EPA has received regarding the cleanup of PCB and other wastes from the COTA property in Columbus, Ohio (located in the 1300 block of Fields Avenue) in the latter half of 2012 or first half of 2013. This cleanup was associated with a Norfolk Southern train derailment in July of 2012 and the subsequent cleanup. Reportedly PCBs and other hazardous waste materials were found during the cleanup of the train derailment and reportedly this happened on the adjacent COTA property. I would like a copy of the cleanup plan, any and all test data and any communications between COTA, EPA, Ohio EPA and/or Norfolk Southern regarding this cleanup and the disposition of these waste materials.

Emailed scans of documents are acceptable in lieu of hard copies.

Please provide me with a cost estimate for copying and providing these documents prior to the effort.

Please feel free to call if there are any questions I can answer.
563-652-2822.

Thank you for your assistance,

David Gossman
